ENTERPRISE AI / EMBEDDED TEAMS

Add AI specialists to your enterprise team.

Dockio-employed professionals work within your AI programme, systems, controls and delivery priorities. Named people, availability and terms are confirmed in the proposal.

Company at a glance

Legal entity	Dockio Technosolutions Private Limited
Operating base	Mumbai, India. India-based remote, hybrid or on-site arrangements are discussed against the requirement; other countries require feasibility review.
Leadership	Sankalp Shirish More, Director
Partner status	OpenAI Select Partner providing independent enterprise AI implementation and specialist delivery services.

Two engagement models

Individual specialist: extend an existing client team under agreed day-to-day direction and scope.
Managed team: a proposed combination of roles with a delivery lead, defined responsibilities, milestones and reporting.

Role coverage

AI engineer	AI workflows, retrieval, tools, model APIs and integration.
Solution architect	Architecture, identity, data boundaries and deployment design.
AI product lead	Use cases, value hypotheses, backlog and acceptance criteria.
Evaluation specialist	Quality criteria, evaluation sets, failure analysis and release evidence.
Adoption lead	Enablement, workflow change, feedback and meaningful repeat use.
Programme principal	Delivery governance, dependencies, escalation and sponsor decisions.

Request named profiles matched to your requirement. Experience, availability, employment arrangements and screening requirements are reviewed for the proposed individual.

PROCUREMENT / READINESS

Evaluate the evidence. Agree the commitment.

We align the supplier review with your contracting and assurance requirements. Confirm the documentation, evidence and terms applicable to your proposed engagement.

Evidence and terms to confirm

Company & tax	Current incorporation, registration, tax and authorised-signatory documents applicable to the contracting entity.
Employment & screening	Named-person employment arrangement, technical assessment, client-required background checks and completion evidence.
Insurance	Confirm applicable professional and cyber insurance coverage, insured entity, limits, scope, exclusions and expiry during supplier qualification.
Security & privacy	Applicable policies and evidence for access, devices, confidentiality, approved AI use, data handling, incident escalation and offboarding.
Commercial terms	Rates, term, any minimum commitment, invoicing, expenses, notice, liability, IP ownership and confidentiality in the MSA/SOW.
Continuity	Replacement triggers, notice, transition support, overlap, knowledge transfer and associated charges agreed in writing.
Delivery evidence	Relevant credentials and delivery evidence. Profiles identify the individual’s role and engagement context; references are shared where permitted.

Onboarding sequence

1. Define: role, seniority, work, location, duration and client owner.
2. Review: candidate fit, availability, assessment and screening requirements.
3. Agree: proposal, responsibilities, terms and access boundaries.
4. Onboard: approvals, client environment, delivery rhythm and review points.

Start dates and engagement duration are agreed after reviewing candidate availability, checks, contracting and client approvals. Confidential evidence is shared through an agreed channel, under NDA where appropriate.
